MAR 20 2008

Claims 1-5 (Canceled).

6. (Currently Amended) A method to provide ~~for providing~~ a data management system, comprising:

preprocessing a database having a relation to produce an index, wherein said preprocessing step comprises:

identifying a dominating vector of constants, \bar{c} , for a given n-dimensional vector of constants \bar{c} ;

receiving a query having aggregation constraints, wherein said aggregation constraints are Optimization under Parametric Aggregation Constraints (OPACs);

applying said index to look up a result in response to said query having aggregation constraints; and
providing said result.

7. (Original) The method of claim 6, wherein said preprocessing step further comprises:

obtaining a partition defined by said vector \bar{c} and said vector \bar{c}' .

8. (Original) The method of claim 7, wherein said partition is expressed as a hyper rectangle.

9. (Original) The method of claim 7, wherein said preprocessing step further comprises:

inserting said partition into a multidimensional data structure.

PATENT
Atty. Dkt. No. ATT/2002-0457

10. (Original) The method of claim 9, wherein said multidimensional data structure is an R-Tree.

Claims 11-24 (Canceled).
